1. The following is an examiner's statement of reasons for allowance: The declaration of Dr. Rao et al. regarding the Wu references establishes that the compositions are essentially the same and that no appreciable difference in the T_g would be expected. This is supported by the teachings of the Choi reference (filed 10/06/2008) in the right hand column of page 1015. The exposure conditions in the inventive process are the cause of the difference in the permanence of the grating, not merely the T_g and there is no motivation to change the exposure levels in Wu et al.. There are significant differences in the azo doped media and azo pendant media regarding the formation of permanent gratings. The formation of the permanent gratings in the inventive process is therefore novel and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J. Angebrannt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Friday.
